شبابنا الحلو .. ربنا معاكوا في اخر
ترم وفي مشروع التخرج.

حنكون معاكوا ان شاء الله في ٣
مواد ... متشغلوش بالكوا بيهم و
ركزوا في مشروعكوا

صلي علي سيدنا محمد

شكر خاص جدا لدكتور كريم محمد علي المساعدة في تحضير الورق

Overview of Electronic Commerce

➤ **Electronic Commerce : Definition; and Concept;...(Exam Exam)**

- **Electronic commerce (EC):** The process of buying, selling, or exchanging products, services, or information via (computer,internet ,online)
- **VIP Note;:**
 - EC include All External Business Transactions with Outside Partners
 - EC based on **Extranet System**

التجارة الإلكترونية: هي عملية بيع , شراء , استبدال المنتجات/الخدمات/ المعلومات بشكل الكتروني
مثال بسيط: لو اشترت موبايل من علي امازون بالنسبة لأمازون عملية بيع الكترونية، و بالنسبة لك
كعملية شراء الكترونية لذلك التجارة الإلكترونية تشمل البيع , الشراء

- **Electronic Business; (e-Business):** broader definition of EC that includes NOT just the buying and selling of goods and services, but also servicing customers ,collaborating with business partners and conducting electronic transactions within an organization

- **VIP Note;:**
 - e-Business include Both (internal Transaction) within organization Such as : Planning/Production Schedule & Product Design and (External Transaction) Such as : procurement raw materials & Recruiting employee
 - e-Business based on **intranet & Extranet System**

ادارة الأعمال الإلكترونية: تعتبر مفهوم اوسع /اشمل من التجارة الإلكترونية انه ليس فقط يقتصر
على بيع، شراء المنتجات والخدمات ويشمل تقديم خدمات اخري للعملاء والموردين

- **VV IMP Note... (From Previous Exam):**

- E-business Greater than EC ✓
- EC part of e-business ✓
- E-commerce include e-business ✗
- E-business include EC ✓

✚ Any Transaction based on Three Dimensions which Are: **ordering , Payment Processing , delivery (Shipment)**

➤ **(What Are The Difference between)**

- **intranet** : An internal corporate or government network that uses Internet tools, such as Web browsers, and Internet protocols
- **Extranet** : A network that uses the Internet to link multiple intranets
- **electronic market (E-marketplace)**: An online marketplace where buyers and sellers meet to exchange goods, services, money, or information

➤ **(Three Types of EC Organization) أنواع الشركات من حيث تطبيقها للتجارة الالكترونية**

1. brick and mortar (old economy) organizations :

Oldeconomy organizations corporations that perform their **primary business; offline, selling physical product; by means of physical agents;**

- **Remember** : brick and mortar = old economy = offline

النوع ده من الشركات ليس لها اي تواجد الكتروني وبتعتمد على البيع المباشر من خلال المحلات

2. virtual (pure play) organizations :

Organizations that conduct their **business; activities; solely online**

- in virtual pure-play organizations No physical existence Location
- **Ex** : Pay-pal
- **Remember** : Virtual = Pure Play = online organization

النوع دا من الشركات تواجدها كله الكتروني وليس لها اي تواجد اوفلاين

3. click and mortar (click and brick) organizations :

Organizations that conduct some ecommerce activities, usually as an **additional marketing channel**

- **Ex** : wal-mart , Carrefour , Samsung
- **Question from previous Exam (T/F) :**
Souq.com can be classified brick-and mortar

X

أما النوع دا من الشركات جمعت بين التواجد الاونلاين والافلاين
مثال واقعي : تقدر تشتري موبايل سامسونج من موقع الشركة او من احدي فروعها وبكدا الشركة تكون جمعت بين التواجد الاونلاين والافلاين

➤ Three Classifications (Dimensions) of EC

أنواع عمليات التجارة الإلكترونية Are

1. Pure EC :

ordering , Payment Processing , delivering are online

Any Product can be bought or sold online Called :

Digital Product

Pure EC تمت بالكامل اونلاين لذلك تسمى

و دي تاني خطوة واستلمت المنتج بشكل الكتروني PDF مثلا: لو اشتريت كتاب الكتروني من علي امازون تعالي نشوف الخطوات اللي اتبعتها علشان تشتري الكتاب، طلبت الاوردر اونلاين ودي اول خطوة وبعدين عملية الدفع ايضا تمت اونلاين

2. traditional Commerce :

ordering, Payment Processing, delivering are **offline**

Any Product can be bought or sold offline Called: Traditional Product

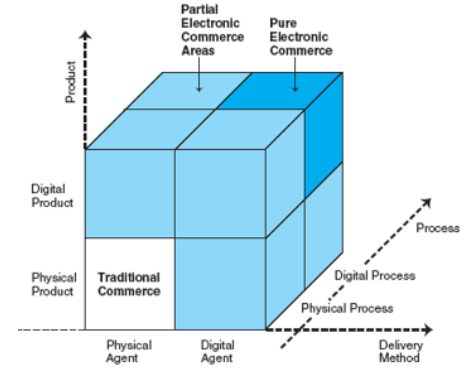

هنا العملية بالكامل تمت اوفلاين

مثلا : عاوز تطلب اوردر من مطعم اتصلت بالتليفون وطلبت الاوردر ووصلك علي البيت ودفعت لا استلمته يعني العملية بالكامل خالية من التواجد الالكتروني

3. Partial EC :

ordering , Payment Processing , delivering are Both online , offline

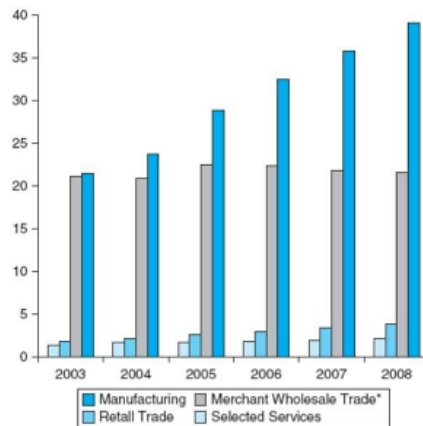

علي نفس المثال السابق: لو بشتري من امازون بردوا لاب توب هاتبع نفس الخطوات طلبت الاور اونلاين ودي اول خطوة وبعدين عملية الدفع تمت اونلاين ودي تاني خطوة بس هنا المنتج هايجيئك علي البيت يعني خطوة التسليم اوفلاين
الخلاصة بقي: خطوات العملية كان فيها جزء اونلاين واخر اوفلاين لذلك تسمى EC partial

➤ Why important Studying EC ?

- EC is in an increasing Trending rate

لان التجارة الالكترونية في الوقت الحالي في معدل نمو /تصاعد مستمر

* Merchant Wholesale Trade data include MSBOs in 2003-2008.

➤ **Classification of EC...(VV IMP):**

هنا نتكلم على الاطراف اللي بتشارك في عملية التجارة الالكترونية

- Company (B)
- Consumer (C)
- Government (G)
- Person or Peer (P)
- Employee (E)

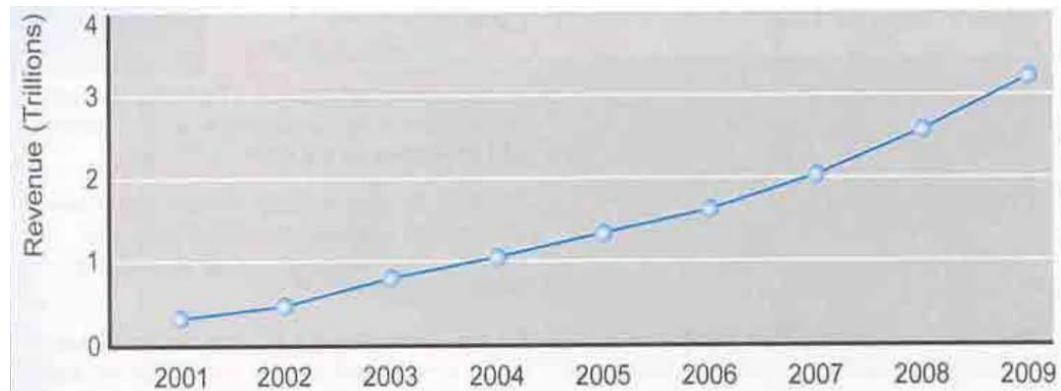

❖ **Business To Business (B2B):**

- A transaction that occurs **between two companies**, as opposed to a transaction involving a consumer
- E-commerce model in **which all of the participants are businesses or other organizations**
- **Companies doing business with each other** such as manufacturers selling to distributors and wholesalers selling to retailers

هنا العملية بتتم من بزنس لبزنس اخر
بالبلدي: نفس فكرة تاجر جملة ببيع لتاجر تجرئة

- **Example:**
 - **Intel** selling microprocessor to **Dell**
 - **Heinz** selling ketchup to **Mc Donalds**
- Pricing is based on **quantity** of order and is often negotiable
- The term may also describe **a company that provides goods or services for another company**

Growth of B2B e-commerce

خلاصة الرسم: ان العمليات التجارية اللي بتتم بين الشركات وبعضها كل سنة ف معدل ارتفاع مستمر

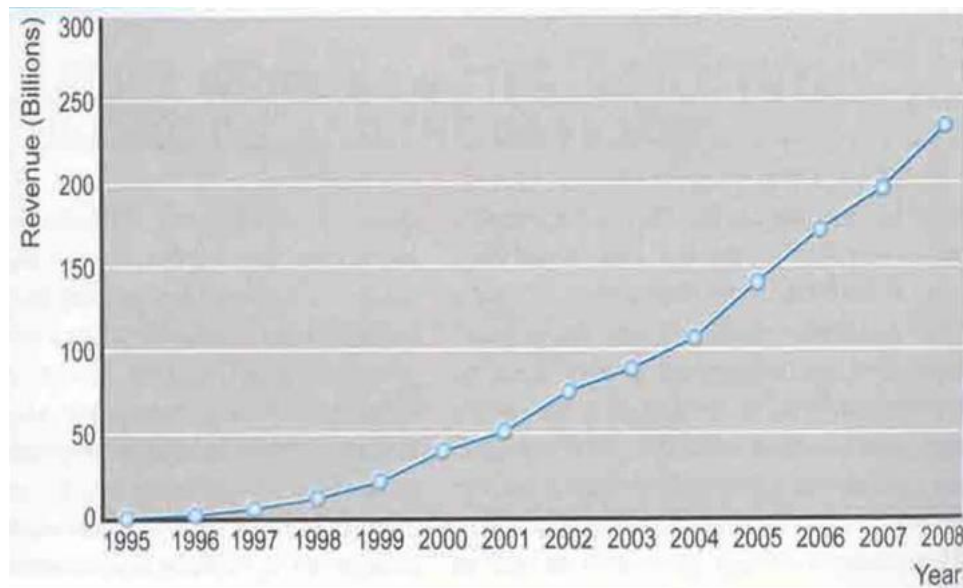

❖ Business to consumer (B2C)

- sometimes also called: (**Business to Customer**)
- describes **activities of businesses serving end consumers** with products and/or services
- E-commerce model in which **businesses sell to individual shoppers**
- **Businesses selling to the general public** typically through catalogs utilizing shopping cart software.

هنا العملية تتم من بزنس للعميل
مثلا: لما تشتري لاب توب من موقع سوق دوت كوم لاستخدامك الشخصي
بالبلدي: من البزنس/التاجر للعميل

- **Example**
 - **Dell selling me a laptop**

Growth of B2C e-commerce

خلاصة الرسةمة: ان العمليات التجارية اللي بتتم بين الشركات والعملاء /المستهلكين ف معدل ارتفاع مستمر

ملحوظة خطيرة: خليك عارف ان حجم المعاملات اللي من النوع ال B2B اكتر بكتيبيير جدا من ال B2C ودا منطقي لان معاملات البيع ، الشراء اللي بيقوم بيها البزنس اكيد اكتر من العميل

- **E-tailing:** Online retailing, usually B2C

نفس فكرة ال B2C ولكن ال **E-tailing** مختص بمنتجات التجزئة فقط

❖ **business to business to consumer (B2B2C)**

- describes transactions in which **a business sell a service or product to a consumer using another business as an intermediary**

هنا العملية بتبقي ما بين أكثر من تاجر والعميل وفيه تاجر بكون وسيط في النص بالبلدي: نفس فكرة من تاجر جملة لتاجر تجزئة للعميل

❖ **Consumer to consumer (C2C) OR (citizen to citizen) electronic commerce:**

- involves the electronically facilitated **transactions between consumers**
- E-commerce model in which **consumers sell directly to other consumers**
- Example: **OLEX & Dubizzle**, eBay
- There are **many sites offering free classifieds, auctions, and forums where individuals can buy and sell** thanks to online payment systems like **PayPal** where **people can send and receive money online with ease**
- **eBay's auction service** is a great example of where **person to person transactions** take place everyday since 1995

❖ **Consumer to business (C2B):**

- is an electronic commerce business model in **which consumers/individuals offer products and services to companies** and the companies pay them.
- E-commerce model in which **individuals use the Internet to sell products or services to organizations** or individuals who seek sellers to bid on products or services they need
- **A consumer posts his project with a set budget online** and within hours companies review the consumer's requirements and bid on the project.
- The **consumer reviews the bid and selects the company** that will complete the project.

❖ **Mobile Commerce (M-Commerce)**

- E-commerce transactions and activities **conducted in a wireless environment**

اي عملي تجارة الكتروني سواء بيع، شراء تقدر تقوم بيها اي وقت وف اي مكان باستخدام الموبايل تسمى **M-Commerce**

❖ Location based commerce (L-commerce)

- **M-commerce transactions** targeted to **individuals** in specific locations, at specific times

هنا مفهوم التجارة بيبقي لكل الاشخاص المتواجدين في موقع معين و في وقت معين من خلال مسجات علي الموبايل
مثال بسيط: وانتا في كارفور بتلاقي ان فيه مسجات اتبعثلك علي موبايلك من براندات موجودة ف كارفور يبلغوك بعروض

❖ intrabusiness EC

- E-commerce category that **includes all internal organizational activities** that involve **the exchange of services, or information among various units and individuals in an organization**

الشركة هنا بتطبق مفهوم التجارة من خلال انها بتبيع منتجاتها لنفسها
بمعني: لو شركة عندها فروع، وفيه فرع محتاج منتج معين ممكن يشتريه من فر اخر بسعر التكلفة

❖ business to employees (B2E)

- E-commerce model in which an **organization delivers services, information, or products to its individual employees**

هنا الشركة بتقدم خدمات للموظفين بتوعها
مثلا: شركت ملابس ولتكن Zara ف نهاية موسم الشتا بيبقي عندها كميات كبيرة من المنتجات، بتعرض علي الموظفين بتوعها ان لوحد عاوز يشتري هياخد خصم يصل الي ٥٠٪ ودي خدمت بتقدمها الشركة للموظفين اللي عندها

❖ Collaborative commerce (C-Commerce):

- E-commerce model in which **individuals OR groups communicate OR collaborate online**
- **VIP NOTE:**
 - Group purchasing is a form of collaborative commerce Peer to Peer **(P2P)**
 - Technology that **enables networked peer computers to share data and processing with each other directly**, can be used in C2C, B2B and B2C e-commerce

❖ E-learning:

- The online delivery of information for purposes of training or education
- **Example:** Coursera, Udemy

❖ E-Government:

- E-commerce model in which a **government entity buys or provides goods, services, or information from or to businesses or individual citizens**
- **Examples of e-government (from lecture):**
 - **Business-to-Government (B2G)**
 - if a business sold a piece of land to Government
 - **Government-to-business (G2B)**
 - if government issued work Permits/ license for business
 - **Government-to-citizen (G2C)**
 - if Government provided services of issuing national ID to citizens through Gov.portal
 - **Government-to-Government (G2G)**
 - if Egyptian Government has Exported a product x to Saudi Arabian
 - **Government- to employee (G2E)**
 - E-commerce model in which a government delivers services, products to it's individual employees

هنا الحكومة بتقديم منتجات، خدمات للموظفين اللي في قطاعاتها
مثال واقعي: الدولة بتقديم خدمات وامتيازات للعاملين ف قطاع القوات المسلحة، الشرطة

MCQ

1. A broader definition of EC that includes not just the buying and selling of goods and services, but also servicing customers, collaborating with business partners, and conducting electronic transactions within an organization best defines

A) e-commerce. B) e-business. C) e-government. D) e-tailing
